RETURN OF MISS EMILY J. BLOUNT. BASIS OF THE ALLEGED COMPROMISE.

The statement contained in THE TRIBUNE of yesterday of a prospective cassation of hostilities in proceedings in Court relative to the custody of Mrs. and Mice Emily J. Blount, and the contempt of Da Riviere in not putting in a return to the writ of habeas corpus, have been partially confirmed by the cocurrences of yesterday, and though the proceedings have not yes been discontinued in Court, there is but hitle prospect of their renewal.

Various reasons, mentioned in THE TRIBUSE yesterday, suggested the advisability of compromising differbetween Mrs and Mr. Blount before witnesses should be brought to the stand to disclose disagreeable facts in connection with the spandal; and the interviewe between Mrs. and Mr. Blount, in which the latter disclosed what would be proven, brought matters at once to a focus. The compromise proposed and acceded to was substantially this: Mrs. Blount, with The assistance of Mr. Huncke, should produce and deliver to Mr. Blount the daughter. Mrs. Blount was also to rejoin her husband, but was accorded the privilege of choosing her place of destination on leaving New-York, as, under the circumstances, it would be

napleasant to go at once to Mobile.

Mr. Blount was to discontinue all proceedings against Huncke and De Riviere of whatever nature, and as the attachment issued by the Court for contempt against De Riviere cannot be withdrawn by the law of New-Jeresy, proceedings were to be taken to have it quashed in regular form, and De Riviere was to b: allowed to go to Europe unmolested; and lastly, Mr. Blount was to foot the bills. That this was substantially the compromise is made evident by the fact that early yesterday morning Miss Blount made her appearat the residence of Dr. Dawees, in Broadway, near Eleventh street, where Mr. Blount has been staying. How or whence she came is a matter of sur mise. Some of the counsel allege that Miss Blount has been in Philadelphia in the care of some friends of De Riviere's counsel, and that being telegraphed last night to return, she I took the 11 o'cleck train at right and arrived in this city at 4 o'clock in the morning. Another theory is at last as regards her return. About 8 o'clock on Thursday evening, Mrs. Blenst, Mrs. Hancke, Mr. Huncke and a Frenchman known to be a friend of De Riviere, teft the Napoleon Hotel in a carriage, some suppose to visit De Riviere and others to get Miss Blount. But whatever he the facte, Miss Blount arrived yesterday morning at the residence of Dr. Dewees, quite ill from the excitement of recent occurrences and glad of the prospect of being once more restored to the quiet of the family circle. From the time of the daughter's disappearance, De Rivere was not at any time informed of her place of concealment, and this was with the consent of Mrs. Blount. Mrs. Blount was still at the Napoleon Hotel last evening, where she will remain until the proceedings are withdrawn in the Courts, and she is ready to take her departure for the South. The daughter will remain with Mrs. Blount when they arrive at their Summer destination, while Mr. Blooms makes a temporary visit to Mobile.

Mr. Blount has in his possession undoubted evidence of the marriage of De Riviere at the French Catholic Church on Canal street. It consists of the original marriage certificate, affixed to which is the signature of the priest and the seal of the Church. He had also subpensed as a witness one of the witnesses of the marriage who would testify as to the correctness of the rames of both De Riviere and his wife contained in the marriage certificate, he having known Mcs. De Riviere in France, she having come from the vicinity of the residence of De Riviere's father. Mr. Bijunt has had two interviews with Mrs. De Riviere in company with Dr. Dewees, and her statements confirm these facts. She is employed as interpreter and governess in a Catholic family of this city.

The imposture of De Riviere is manifest by his va-

rious pecuniary shortcomings, incompatible with the fabulous estates he owned in France. On his passage to this country in the Vanderbilt he was unable to pay his fare, and was compelled to leave one of his trucks and contents as security for its payment. It was dis-severed, on examination, that the property was not worth the half of the amount due. He had no means to pay his fare from New-Orleans to Havana, but a Frenchman in New-Orleans drew a draft on D+ Rithe esptain of the steamer to accept, on the assurance that he should have means at Havana to meet the draft at maturity. Mr. Blount learned this fact at Havans, and, the passage of his wife and daughter having been paid with this draft, he cashed it himself, and

has it now in his possession.

Facts, too, are not wanting, in connection with his duel in Mobile, to show that De Riviere is an arrant coward as well as an unprincipled secondrel. Mr. Maury, by whom he was challenged, was a teacher of music and French in Mobile, and in such espacity had been engaged in the family of Mr. Blount. He suspected the character of De Riviere, and objec'ed to his intimacy with the Blount family. This resulted in a difficulty, and a challenge on the part of Maury, which De Riviere accepted. When about to leave for the field, Mrs. Blount states that he took her aside and informed her that he had to impart to her a secret of great moment; that he was not what he had repreented himself to be, a mere soldier, but that he was of a roble family in France, and heir to an immense estate. In case he should survive in the duel, he desired her to keep this a profound secret; if he died, he maked that she would act as his friend, and see that he was buried, and then communicate the facts of his death to his friends in France. In addition to this, he informed her of what Mrs. Blount says he had not until then announced, that he had formed an ardent and enduring attachment for her daughter Emily, and, in conclusion, said that she must excess his troubling her with his secrets, es he should not have so done had he not been in danger of death, and that she must as cept his words as those of a dying man.

De Riviere then proceeded to the place of meeting. Maury has the reputation of being a superior shot, and on the first fire De Riviere was struck with the ball, but was not in ured. Maury's second, perceiving this fact, said to Menry that De Riviere had a cost of mail congested under his clothes, and amiably suggested that Maury fire at his head. On the second shot he did so, and the ball struck De Riviere underneath the right eye, shattering the check hone. De Riviere was carried from the field.

Mr. Blount has now in his possession the fixtened bullet taken from De Riviere's person, after the first shot was fired. De Riviere says that it struck a halfdeliar which he had in his pocket. Others state, however, that the indentations on the surface cannot be accounted for an any such hypothesis, and that they Riviere was protected by a coat of mail; certain it is, that, with all of De Riviere's boasted prowess as a shot, he falled to injure Maury on either fire.

It is said that two detectives are now searching for De Riviere, for what purpose it is not known.

FRIDAY, July 16-P. M.

There was a fair degree of animation at the Stock Exchange to-day, and in early transactions prices had a decidedly upward tendency, but as the business of the first session came to a close, the tone changed a little, and the market gave slight indications of dull ness and reaction. This was taken advantage of after the adjournment by the bear operators outside to establish lower quotations, but in the afternoon there was a partial recovery in prices for leading shares, and the market finally closed firmer. By an error of the types we were made to say yesterday that an "unusual" number of outsiders were participating in the movements, which is far from being the trute. Our intention was to say that outside orders had increased, which is the fac', but the amount of business with the commission brokers is still quite limited. There is quite a sharp corner in Pacific Mail Company stock—the Frazer River emigration coming in as a very favorable item of news for the party operating for the rise, at a time when the shorts were troubled to make deliveries. The quotashorts were troubled to make deliveries. The quota-tions run up to 84] in the morning and to 85] in the afternoon, an advance of about 4 to cent during the day with sales of over 1,000 shares. The rapid advence is quite likely to bring stock into the market, Company. The Eric Railroad accident knocked the stock down to 181, but there was a good demand for the shares at this quotation in final transactions. New York Central maintained steady quotations during the day, but was not especially active. We understand that 3; P out was offered for the August dividend to-day. In the Western shares the business proving prices, and the market may be called strong for the prominent roads. Michigan Central advapoed to 581 in the afternoon, and was firm. The business of the Clearing House was \$16,548,749. The Metropolitan Certificates are now reduced to \$9,000, and will soon be reduced to \$1,600, which must await the settlement of the affairs of the Pratt Bank of

Mr. S. T. Bull, State Agent of Ohio here, who has been connected with that agency for twenty years, has resigned, and, with great regret, the State officers have accepted his resignation. The name of Mr. James A. Brigge, formerly of Ohio, has been sent to the Gov. erner for the vacancy, and he will no doubt be confirmed. The new arrangements made by the State. which require all transfers to be made at Columbus, and all interest not collected by the 14th of the month, after maturity, to be collected also at Columbus, which arrangements have given a great deal of dissatisfaction

here, are probably the principal reasons for Mr. Bull's resignation. We hear much regret expressed in the treet at his retirement from the position which he has so long occupied, for while he has been a most faithful agent for the State, by his pleasant manners and spirit accommodation he has gained the respect and es-

teem of all who had business to transact at his office.

The annual meeting of the stockholders of the Norwich and Worcester Railroad Company was held in Norwich on the 14th inst. The following ticket was elected: Augustus Bremler, Charles Johnson, Jededish Huntington, J. N. Perkins, Case. J. Stedman, John A. Rockwell, Moses Pierce, John Dunham and John T. Wait of Norwich: Robert Bayard and John A. Weeks, of New-York; F. L. Lockwood of Danie'sville: A'ex. Dewitt of Oxford: and David A. Neal of Salem. Augustus Bremler was rediscred President.

It is stated that the New-Haves Railroad Company have prepared a bill, and are about to apply to one of the Federal courts for an injunction to restrain the Corporation from interfering with their right to use steam on the Fourth avenue to Thirty-second street.

The receipts of the Wabash Valley Road for the first week of July are \$12,700—an increase of \$2,000 on the previous week. The Wea Bridge is repaired, and forty cars of cattle passed over it on Saturday.

The Bellefontaine and Indiana Company are now paying 20 P cent on the principal of their Real Estate Bonds, due Jazuary 1 last, and are giving, as proposed, their Extension Bonds at 3, 5 and 8 years for the remainder. They, also, pay the arrears of interest on this particular class of Bonds, and hope to resume regular payments of interest on their Mortgage Bonds in about 60 days.

The steamer to-morrow will take \$600,000 o \$700,000 in mint bare, which have been bought at about ? F cent discount. The supply of bars has been rather pressing on the market. California bars are held at ‡ er cent premium. The shipments of gold, it is anticipated, will now be regular and to considerable extent until the new Cotton crop increases the supply of bills, unless any considerable portion of the Government loan should be taken in Europe, which, of course, would have a material influence upon the exchange market. The Canandaigus and Elmira Railroad was to have

been sold on the 14th (Wednesday), under foreclosure of the Second Mortgage, but it is not supposed that any bid was made for it, and it will probably pass into the hands of the First Motgage bondholders. The overdue First Mortgege interest amounts to \$35,000, and if it is paid before the 23d inst., the time fixed for the First Mortgage sale, the Second Mortgage bondsolders may probably make arrangements for running the road

under their own management.

The operations on the Minnesota and Pacific Railread are in course of vigorous presecution. Nearly 400 men are already at work above St. Anthony upon an extent of 14 miles. Two miles of grade are completed. The work will be resumed between St. Paul and St. Anthony as soon as the settlement of some questions affecting the right of way permit the Com-

pany to fix the final location of the road.

There is a fair demand for Treasury notes, with a noderate supply on the market. The Pacific Mail Steamship Company has recently been a large buyer for investment of its funds, the Trust Company declining to receive any more on deposit. The 44 per cents are 10 a 15c. premium, the 47 per cents 30 a 37 jc. premium, and the 5 per cents 60 265c. premium. Land Warrants have been in more active demand within a few days, and the rates have advanced. Messrs. Taylor Brothers quote as follows:

It also abolishes all outside agencies and runners, leaving the freights to take their own ratural course; and under the agreement the through passenger fare on the New-York roads is to be restored to the former rate, or about double what it has been lately in the efforts of the Eric and Central to do as much harm as they could to one another. This general measure was fully agreed to by the representatives of the New York Central, the Pennsylvania Central, and the Baltimore and Ohio roads, while it is understood that personally Mr. Moran, the President of the Eric road, was also willing to come into it. The measure had, of course, however, to be submitted to the Directors of the several roads for approval, and the time to the lifth instant was allowed for that purpose. The Baltimore and Ohio Board yesterday acquiesced, with only three dissenting votes."

The Rochester Union Says:

"The proposition which, according to the best advices we can obtain, will finally be adopted by the Central and the Rochester and Genesse Valley Railroads, is substantially the following: The management of the Rochester and Genesse Valley Road is to be transferred to the Central Direction: the latter is be change the gange of the Valley Road, so as to conform to the Central's, and is to run the road at its own expense, and to keep it in good condition in perpetuity. The Valley Company is to have, as a consideration in full for this transfer or lease of its property, 35 % cent of the gross earnings of the road, the 45 to be retained by the Central to indemnify that Company for the expense of running, repairs, &c. The leading stockholders of the Valley Company are confident that under this arrangement the stock will pay a liberal percentage. We shall see—if the arrangement be, as we presume it will soon be, consummated.

CONSULATE OF HAMBURG,

NEW-YORK, July 15, 1888.

Sir: I am authorized officially to bring to the knowledge of the commercial community of this consular district that the former commercial pound of Hamburg was put out of use on the 1st of January last, and that in its stead the metrical or the German customs weight, which is 3.1739 per cent heavier, and equal to a half-kilogramme, has been adopted. Accordingly, all quotations of prices given in the Hamburger Alligementer Preisconrust have since that date already been calculated for the metrical weight.

By bringing this fact to the notice of your readers, you will oblige.

Your obedient servant.
